EXPERIENCE

Backend Developer (Bootcamp Trainee) | CodersLab & TrendyolTech **May 2025**
Remote

- Completed an intensive backend program with CodersLab and Trendyol Tech, building **RESTful APIs** and **microservices** in **Java and Spring Boot** with **SQL** and **MongoDB** persistence.

Freelance Video Editor **July 2024 – Sept 2026**
Remote

- Delivered video content for clients over **2+ years**, consistently meeting tight deadlines and client goals, by producing every project independently.

Customer Service | Taho Petrosani **June 2023 – August 2023**

- Delivered high-quality service in a fast-paced hospitality environment.

EDUCATION

University Politehnica of Bucharest **2024 – Present**
Bachelor's in Computer Engineering – GPA: **9.38/10**

TECHNICAL PROJECTS

Inventory Manager – REST API | Java 23, Spring Boot, Spring Security, JWT, JPA View Project

- Delivered a secured backend of **21 REST endpoints** across 4 resources (auth, users, categories, products) by implementing **stateless JWT authentication** and **3 role levels** (Admin, Manager, User).
- Enabled product search on **7 filter parameters** with pagination and sorting through **JPA Specifications**, and prevented N+1 queries with **@EntityGraph**.
- Prevented concurrent stock overwrites by adding **optimistic locking** (@Version) and **@Transactional** service methods.
- Verified business rules (duplicate SKUs, 409 conflicts, role changes, JWT expiry) with **unit tests** using **JUnit 5, Mockito and AssertJ**.

Smart-Pet Feeder | Embedded Rust (Embassy), Raspberry Pi Pico 2 W View Project

- Built a **WiFi-enabled** automatic feeder with remote web control by integrating **8 peripherals** over **I2C, SPI, PWM and GPIO** around a Pico 2 W state manager in embedded Rust.
- Ensured scheduled, weight-verified portions by closing the loop between an **RTC schedule**, **load-cell feedback** and **servo dispensing**.
- Added **PIR pet-presence detection**, push-button input, a color display with LED/buzzer status, and **microSD event logging**.

Event Discovery Platform | Full-stack, web and mobile In development

- Delivering **real-time event alerts** and a synchronized experience across **2 platforms** (web and mobile) by building a single full-stack application.

Veterinary Clinic Database | Relational database design, SQL

- Streamlined clinic operations by designing a relational schema that centralizes **patient records** and **appointment scheduling**.

2D Java Platformer Game | Java

- Built a playable platformer with **custom physics** and **precise collision detection**, adding **progressively scaling difficulty levels** to raise the challenge.

TECHNICAL SKILLS

- **Languages:** Java, Rust, C++, JavaScript, Bash, HTML/CSS
- **Backend:** Spring Boot, Spring Security, JWT, Spring Data JPA / Hibernate, REST APIs, OpenAPI/Swagger, Maven
- **Testing:** JUnit 5, Mockito, AssertJ
- **Databases:** MySQL, PostgreSQL, MongoDB, H2
- **Embedded & Tools:** Embassy (Rust), Cortex-M, Git/GitHub, Docker, Linux, KiCad, MATLAB

CERTIFICATIONS

- Microsoft Azure Fundamentals · IC3 Global Standard 5 · Cambridge English C1 · NVIDIA: RAG Agents, Industrial Inspection, Data Parallelism (Multi-GPU Deep Learning) · Backend Developer Bootcamp (CodersLab & Trendyol Tech)

VOLUNTEERING

- **Active Member, Google Developer Group (GDG Europe):** took part in workshops and hackathons.
- **Trainee, Robotics Club Roboforges**
- **Member, Faculty of Engineering Students Association**
